

How to use the templates

The EMOTIVE bot templates are designed to be used on Snatchbot. Snatchbot is a free chatbot building tool that requires no previous programming experience.

1. Download one of the EMOTIVE templates from <http://athena.emotiveproject.eu/chatbot/>.

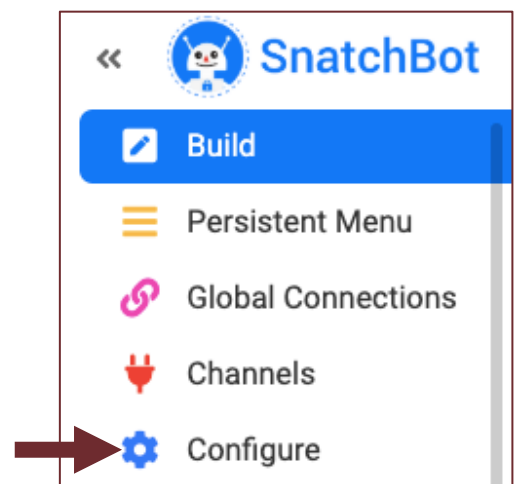

2. Login or create an account on Snatchbot (<https://snatchbot.me>).

3. Select "Create a Bot " and fill out the bot's information.

A screenshot of the 'Create Bot' form in the Snatchbot interface. At the top, there is a blue button with a white plus sign and the text 'Create Bot', with a question mark icon to its right. A red arrow points from this button down to the form. The form itself has a title bar 'Create Bot' with a close icon. It contains several fields: 'Bot Name *' with the value 'Template Model', 'Bot description *' with the value 'This Bot uses the EMOTIVE Funnel Model', and 'Bot Language *' with a dropdown menu showing 'English' and a UK flag. At the bottom of the form is a circular profile picture placeholder with a brown, textured background and a white 'x' in the center.

4. Select the "Configure" menu from the side bar.

5. Go to the backup/restore tab (located at the top of the screen).

6. Select 'Import' and upload the template.
